## PROFILE

My BSc and my two MSc helped me to acquire a wide range of knowledge in different fields of C. S. After graduation, I 've worked for 2 years in Capita where I had the opportunity to gain experience in C#. I spent a year in Clarksons being a part of a big development team working in an Agile environment implementing Kanban and Scrum. Currently, I am part of a small team in a hedge fund in the city of London solving problems using C# and MS SQL.

## SKILLS

Work: C# MS-SQL Html Css

Universities: Java Javascript Mysql Bootstrap

## PROJECTS

### Ion Asset Architecture

Sep 18 -

Wrote parsers for fetching data from various exchanges, developed Win Forms and CMD line tools to automate processes. Currently working on a plugin for the trading engine.

### Clarksons

Sep 17 - Sep 18

Digitalize paper documents, make them editable online and print them as PDF using Css, Html and MS-SQL

### Capita FHE

Sep 15 - Sep 17

Wrote a windows app that included SQL scripts to convert the colleges' database in order to accept Unicode characters. I, also changed our C# codebase to comply with the database's types conversion.

I conducted a usability group at a college to measure the success of our app and receive feedback. I created the structure of the day, ran the group and analysed the outcome.

Worked on a greenfield project for implementing the application layer of an already existing web app because it was using an outdated framework. I chose the CSS framework and implemented some components of the SPA using Angular 2+

### RGU dissertation

June 15 - Aug 15

Implemented a website using Bootstrap, JavaScript and NoSql where the user was able to join/create a football event and also it was a platform connecting owners of 5 a side fields with their clients

### Nottingham Uni. dissertation

June 14 - Aug 14

Developed an Android app which used Bluetooth, GPS and web services to store locations, on the cloud, of nearby Bluetooth devices creating ad hoc networks
